UNIVERSITÄT
TRIER

In the framework of the funding programme "Forschungsinitiative" of the federal state of Rhineland-Palatinate, the Trier Center for Digital Humanities (TCDH) at the University of Trier, Germany, is offering (with a planned start no earlier than 1st May 2022) **a fellowship for a postdoctoral researcher** on a temporary position as

Research Assistant
(m/f/d, FTE, Remuneration Group TVL-13)

with a duration of 12 months. The fellowships are connected to the project "Mining and Modeling Text: Interdisciplinary Applications, Informational Development, Legal Perspectives" (MiMoText).

Since the beginning of the year, the TCDH has been a central scientific institution of the Trier University. The internationally well-established institution was founded in 1998 and is one of the oldest institutions of its kind in Germany. Its goals are to develop and apply innovative computational methods and procedures in order to address questions in the humanities and cultural studies, to develop new research approaches in these disciplines, and at the same time to contribute to the development of new research fields and methodologies in subjects areas related to digital methods in the Humanities. The TCDH focuses on research in the fields of e-lexicography, digital scholarly editions, research software and computational literary and cultural studies.

The aim of the project "MiMoText" is to further develop the field of quantitative methods for the extraction, modelling and analysis of information relevant to the humanities from extensive collections of texts and to research it from an interdisciplinary perspective (Humanities, Computer Science and Law). The core concern is to address the conceptual, analytical, legal and infrastructural challenges for the development of an interlinked knowledge network fed from various sources. The primary domain of application is Literary History. In particular, methods of Information Extraction and Linked Open Data / Semantic Web are used.

Fellowships will be awarded to researchers with projects that are clearly related to the fields of work of the TCDH outlined above and to "MiMoText". Interdisciplinary projects proposals are welcome. The fellowship is remunerated within the framework of a position as a research assistant (TV-L E13, 100%). The fellowship is connected to the provision of a research workplace at the TCDH in Trier. By accepting the fellowship, the fellow agrees to participate in the activities of the TCDH and to prepare a final report.

Interested fellows are requested to apply with the following documents:

- Curriculum vitae with a detailed description of the scientific career
- Copies of diplomas from high school and university
- Outline for a research project to be carried out at the TCDH (approx. 3 pages)
- It is also kindly requested to submit a publication.

Applications must be submitted in digital form (in a single PDF file) **by March 13, 2022** to the Scientific Directors of the TCDH, Prof. Dr. Claudine Moulin (moulin@uni-trier.de) and Prof. Dr. Christof Schöch (schoech@uni-trier.de). Further information can also be obtained from the research coordinator of MiMoText, Dr. Maria Hinzmann (hinzmannm@uni-trier.de).

The Trier University aims to increase the number of its female scientists and strongly encourages them to apply. Severely disabled persons will be given preferential consideration if they are suitable.
